Deadline to register Peak Reduction Certificates (PRCs)

We have made a change to the PRC Certificate Registration form that reflects the deadline requirement for the registration of PRCs: PRCs must be registered no later than six months after the end of the compliance period in which the peak demand reduction capacity is made available.

For example, PRCs created from the capacity generated from an activity between 1 April 2022 and 31 March 2023 must be registered by 30 September 2023.

If the PDRS vintage year selected in the Certificate Registration form does not meet the deadline requirement, a message will be displayed on the screen, advising ACPs that they have missed the deadline to register the full amount of PRCs based on the PDRS vintage year selected.

In the example above, this would mean that the 2023 vintage PRCs won't be created and payment for those certificates won't be required. ACPs will still be able to proceed completing the Certificate Registration form for the rest of eligible vintages. When the ACP selects the **Submit** button the rest of the future vintages will be created and invoiced.

u have missed the deadline (30 September) to register the l included in the total amount being registered eriod Start Date	full amount of PRCs for the PDRS vintage year selected. As such, the corresponding vintage PRCs will	l noi

After the calculation has been completed, when the ACP selects the **Accept** button, a message will be displayed. The ACP has the option to proceed with the registration by selecting the **OK** button, or stop the registration and return to the Certificate Registration form by selecting the Cancel button

Further information on the registration deadline requirements can be found here

Reload button on PRC Registrations

We have made changes to PRC registrations to allow for more efficient processing of large implementation files (3000 implementations limit still applies).

When a PRC Registration case has been submitted and you are presented with a case number, TESSA will continue to keep creating the relevant PRC certificate batches for all the vintages applicable for an activity. You will see a **Reload** button at the bottom of the case. Click **Reload** or reload your browser to ensure that all certificate batches have been successfully created for the case. Once TESSA has finished processing your certificate batches the **Accept** button will then appear for you to continue acceptance of the Certificate Registration case. You will need to keep clicking on the **Reload** button until the **Accept** button appears.

Ability to cancel an ACP Audit

ACPs can now cancel an ACP Audit case. When the ACP Audit case form is opened, if the ACP scrolls to the bottom of the screen, a cancel button now appears.

										Cancel

When the ACP selects the **Cancel** button, a prompt will appear asking the ACP to confirm they would like to proceed with cancelling the ACP Audit case. To proceed with the cancellation, the ACP needs to select the **OK** button on the prompt. To stop the cancellation, the ACP needs to select the **Cancel** button on the prompt.

Warning!	×
Are you sure you wish to cancel the workflow? The case will be cancelled and you will need to resubmit.	
ОК Сало	cel

Once the ACP selects OK button, the status of the ACP Audit case will be changed to cancelled.
